

FIG. 2 and FIG. 3 are exploded perspective views of the medical device. FIG. 2 shows the device in an open state, with the cap (1) separated from the main body (3). The cap (1) features a mesh screen (5) and a hinge mechanism (13). The main body (3) has a proximal end (4) and a distal end (7). FIG. 3 shows the device in a closed state, with the cap (1) attached to the main body (3). The cap (1) is shown with a curved arrow indicating its movement. The main body (3) is shown with a curved arrow indicating its movement. The device is labeled with various components: 1 (cap), 2 (hinge), 3 (main body), 4 (proximal end), 5 (mesh screen), 7 (distal end), 13 (hinge mechanism), and 14 (proximal end of cap).
